Keep your child's teeth healthy

Teeth are important possessions. Here are some tips for keeping them healthy:

- Clean teeth, gums and tongue at least twice a day with a soft toothbrush. Parents should supervise tooth brushing until children are 8 or 9 years old as children do not have the dexterity to brush the molars properly until then.
- Adults and children should use a pea-sized amount of fluoride toothpaste. Toothpaste should be spat out after brushing and never eaten or swallowed. Do not rinse your mouth out with water after brushing your teeth.
- Rinse your toothbrush thoroughly after brushing and store it hygienically. Replace your toothbrush regularly.
- Older children and adults should floss their teeth daily.
- Eating and drinking healthily is important for keeping your teeth healthy - try to keep away from too much sugar, especially between meals.
