### NUMBER FAMILY RUMMY

You need a deck of cards (ace to 10 only, ace = 1).

Deal 6 cards to each player. Place the remainder of the cards in a pile, face down in the middle.

The aim of the game is to use addition or subtraction to make 'fact families', using 3 cards. For example, 5, 5, 10 ( $5+5=10$ ) or 7, 4, 3 ( $7-4=3$ ). If you have a family of 3 cards, place them aside. If you do not, choose a card from the middle pile and discard one card. You can have no more than 6 cards at a time. The first person to discard all 6 cards to fact families is the winner!

Tick when completed \_\_\_\_\_
