### ***Bedwetting: From Clare the School Nurse***

Bedwetting, or nocturnal enuresis, is very common in children. Bedwetting has nothing to do with dreaming, and children who wet the bed are not “just being lazy”. If your child wets the bed, there are a number of things you can do to help, such as using a waterproof mattress cover and establishing a before-bed toilet routine. It is not helpful to punish children who wet the bed. Fluids should not be restricted, even before bedtime. Sugary or caffeinated drinks should be avoided. If your child is still wetting the bed after five and a half years of age, seek help through a referral by your local doctor. A bedwetting alarm is an effective and safe method of treatment available for nocturnal enuresis and may be appropriate for your child. Contact your local Community Health Nurse or Community Health Centre, **Clare Pargeter** on **6330 3123** for more information.

Please check the school website regularly to ensure you are up-to-date.
