

日本語

Well, we are well into term one and the learning in Japanese is full steam ahead!

Our Year One students have settled in well and are learning their numbers and Japanese songs as quickly as I can teach them!

Our year 2 & 3 students are learning to write and count beyond 20 and are now starting to revise their names and vocabulary words in our school topic. We are also adding new phrases and grammar structure to their language development as the year progresses. The first alphabet (Hiragana) is now being introduced through games and activities that develop their memory and consolidate their progress.

Our Year 4,5 & 6 students are progressing well and studying hard for their First Hiragana test of the year.

I have introduced and sent home many different strategies and techniques and pamphlets to help them with the memory part of their study. Hopefully, they have shown you some of these! I am so proud of the way so many of our students have taken on the responsibility to study their Japanese and show what amazing independent learners can do!

Our Year 2 and 3 students are practising their vocabulary for our “School” topic and teaching each other the words they remember. We begin playing Japanese bingo soon, so we are giving our best efforts and helping each other improve.
