

日本語

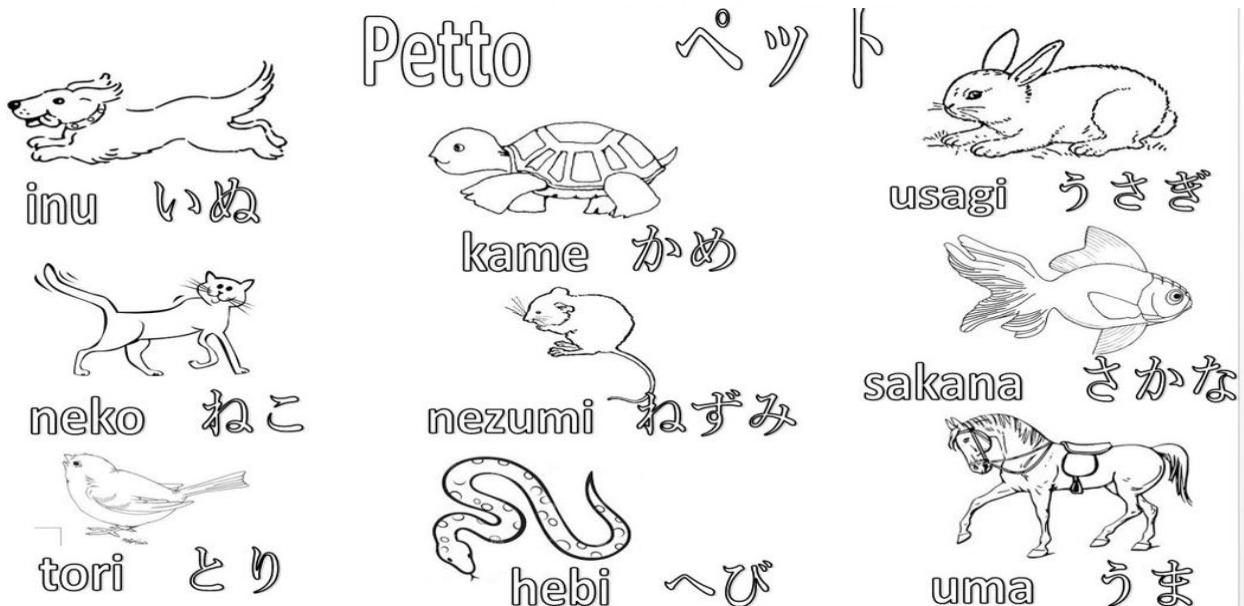

Term 2 Weeks 6-10

This half of the term, our students are working on their fluency when recalling Japanese topic words.

Our Year one classes are being introduced to Japanese names for pets, and our year 2 classes are revising what they know in games to recall and aid their fluency

Translation  → Dog → いぬ

Fluency  → いぬ

Our years 4-6 classes are now extending their vocabulary by learning more descriptive words for nouns and to describe their feelings as well as positional words such as behind, above and underneath.

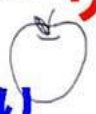

ひらがな
Hiragana

As always when learning a new language, it is a goal for the students in years 4-6 to continue their revision of Hiragana to help them learn with greater fluency.

Our year 5 students are all beginning their second alphabet of KATAKANA and some year 6 students who are working at a higher level are choosing to learn too.

Recording our learning on video!!!!
Our year 4,5 and 6 classes are great at reflecting on their learning.

During our recent 3 ways you would have had the opportunity to listen and celebrate the learning progress of you children in Japanese .

Hopefully, you saw the learning and saw the children reflect honestly on their progress in language learning.
Im sure you will agree, their confidence to express their learning is impressive!
